

Introduction

Welcome to the first chapter of the Junovy Chat guide — your team’s hub for fast, secure collaboration. Junovy Chat is powered by Rocket.Chat and brings together channels, direct messages, threads, files, calls, and integrations in one place.

What you can do here

- Chat in public channels for open team discussions
- Create private groups for focused work
- Send direct messages and start threads to keep topics tidy
- Share files, snippets, links, and reactions
- Join audio/video calls and share your screen
- Search across messages and files with filters
- Tune notifications per-room so you only get what matters

Who this guide is for

- New users getting started with Junovy Chat
- Power users who want to learn threads, search, and shortcuts

- Team owners or moderators managing channels and etiquette

How this guide is organized

- Getting set up: clients, sign-in, a quick UI tour
- Messaging basics: channels vs DMs, replies, mentions, files
- Staying focused: notifications, search, stars and pins
- Collaboration: calls, slash commands, and keyboard shortcuts
- Preferences and privacy: profile, E2EE, and best practices

If you already have an account, jump ahead to “Sign In & Roles”.
